Iron Water Filtration

ProMate 6.0-IC 2.0

THE IRON CURTAIN JUST GOT FRIENDLIER

 IRON CURTAIN[®]
SYSTEM 2.0

How Iron Enters Your Home

Iron is one of the earth's most plentiful elements, making up at least 5% of the earth's surface. As rainwater makes its way through the ground and into our waterways, it dissolves and collects minerals like iron along the way. Excess iron is found most often in wells, but can also enter your home through poorly filtered municipal water systems or aging pipes and plumbing. Left unfiltered, iron can cause water to have a metallic taste, rotten egg smell and create hard-to-remove rust stains on household fixtures and appliances.

Benefits of ProMate 6.0-IC 2.0 Iron Water Filtration

-  Eliminates rust stains in the bathroom, kitchen and laundry, saving you time and money on cleaning
-  Clothing will be brighter, whiter and last longer
-  Lengthens the life of water-using appliances and fixtures
-  Water-using appliances and fixtures stay cleaner longer, reducing the need for frequent cleaning
-  Lengthens the life of your water softener and drinking water systems
-  Reduces need for hazardous chemicals in the home, avoiding damage to plants and animals

ProMate 6.0-IC 2.0 Reduces:

- Iron
- Sulfur
- Manganese
- Rotten egg smell
- Organic and musty smell

It's clear. Getting rid of excess iron in your home's water makes a big difference all around the house—and for everyone in it.

ProMate 6.0-IC 2.0

ONLY THE BEST WATER GETS PAST THE IRON CURTAIN

ProMate 6.0-IC 2.0 is the chemical-free alternative for removing iron, sulfur odor, and manganese. Leading water treatment professionals have called it the best and most reliable iron and sulfur (rotten egg odor) removal system available.

SYSTEM FEATURES:

- 💧 Digital display with user-friendly electronics
- 💧 On-demand regeneration based upon water usage
- 💧 Back-lit display makes it easy to read, and alerts you of system notifications
- 💧 Corrosion-resistant control valve, body and tanks for a longer life
- 💧 All internal components are lead-free

HERE'S HOW IT WORKS

Forcing untreated water through an aeration tank converts iron, manganese and sulfur into physical particles that are filtered out as water moves through the filter bed. When the aeration tanks oxygen level nears depletion, the ProMate 6.0 controller automatically puts it into air recharge cycle based on the gallons of water being filtered, providing you with aeration on demand. When the filter tank is saturated with iron particles, the ProMate 6.0 automatically puts it into regeneration, flushing the trapped iron particles to drain during off peak hours to maintain efficient filtration of iron particles.

ProMate 6.0-IC 2.0

Ecologically Friendly

- The Iron Curtain System is a green technology

No Harmful Chemicals

- No harm to plants, pets and children
- Results in low-cost operation

Highly Oxygenated Water

- Free from odor
- Free from problem-causing rust

Patented Technologies

- Decades of proven reliability
- Recently updated patents and features improve efficiency

Self-Diagnostic Software

- Shows flow rates, operation sequence, time and maintenance schedule
- Displays local service provider's phone number
